

VOICE MESSAGING

VOICE SERVICES

Out and about – and in control.

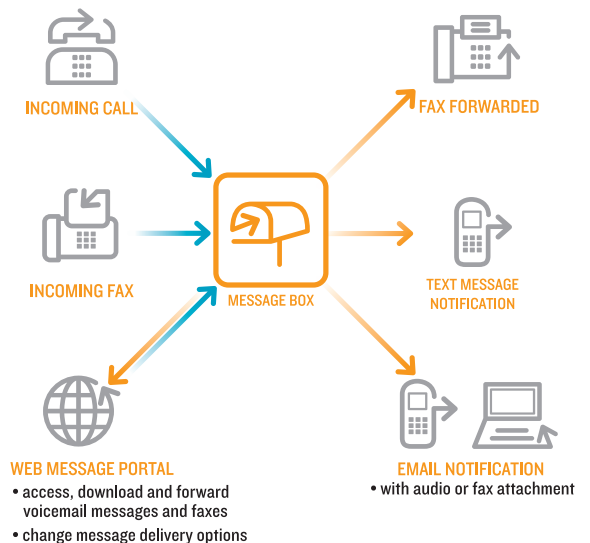

Enjoy the freedom of never being tied to your desk with Integra's advanced voice messaging solution that's mobile – just like you. Imagine standing in your favorite coffee shop and receiving a fax on your PDA or a voicemail in your email box. Integra's voice messaging solutions put you in control.

HOW IT WORKS

New voicemail and faxes are stored in your message box. You decide how you want to be notified of new messages and how you want to retrieve them. Easily change your preferences on-the-fly using a simple web interface.

PREMIUM PACKAGE FEATURES*

- Forward voicemail to email and listen online
- Forward incoming faxes to email
- Web administration of message box options
- Web interface to your message box from any Internet connection
- Notification of incoming voice messages and faxes via pager, text message, email or phone call

Add a Virtual Receptionist [NO HIRING NECESSARY]

Manage your incoming calls with Integra's Auto Attendant feature. This customizable option allows you to direct calls to different departments, voicemail accounts and extensions. You'll save time and money and your callers will get directly to the right resource. Ask us today how your business can benefit.

*Basic Package without web interface option also available; includes standard voicemail features.
